Creating a Global Vaccine Action Plan: Critical Considerations for the Decade of Vaccines Collaboration

Summit Working Breakfast | 07:15 – 08:30, June 23, 2011 | Harbor Dining Room, Bell Harbor Conference Center

This interactive Summit working breakfast will focus on identifying critical considerations for the Decade of Vaccines Collaboration working groups. R&D, Delivery, Global Access, and Public and Political Support are core areas of focus for creating the Global Vaccine Action Plan.

QUESTIONS TO BE ADDRESSED

- What critical issues should science, industry, policy, practitioners, and civil society consider in developing a Global Vaccine Action Plan?
- How would such a plan differ from or integrate with existing frameworks, such as the UN Join Action Plan for MNCH, the Global Immunization Vision and Strategy and GAVI?
- How could a Global Vaccine Action Plan appropriately leverage the unique capabilities of the private sector? How can industry engage in the Decade of Vaccines Collaboration?
- What success stories around vaccine delivery partnerships in low and middle-income countries can inform the development of the Action Plan?

SPEAKERS

Moderator  
Pedro ALONSO  
Professor & Director, Institute for Global Health of Barcelona

Discussion Catalysts  
Samuel PONCE DE LEON  
General Director, BIRMEX

Rino RAPPUOLI  
Global Head, Vaccines Research, Vaccines & Diagnostics, Novartis

Vitoon VONGHANGOOL  
Managing Director, Bionet-Asia Co. Ltd
